

# Running the ZMR35 report | Quick Reference Guide

## Background

**ZMR35** is a blocked invoice report for PO related line items that are blocked for price or quantity variance. It is a dually managed SAP report reviewed and resolved by both Accounts Payable (AP) and procurement teams before an invoice can be paid.

## Purpose

This aid outlines how to execute and review the data from the SAP Block Report (**ZMR35**).

## Conditions

The **ZMR35** report shows all invoices automatically blocked for payment (R Block) in SAP, which will not pay out until released. R Payment blocks are due to **Quantity Variance**, **Price Variance**, or a combination of both.

## Process

### Open the transaction

- Enter the SAP Transaction Code **ZMR35**.

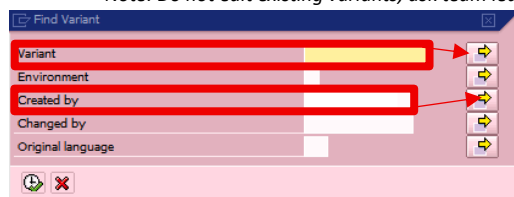

### Enter the selection criteria

- Check for pre-existing team variants:
  1. Click on Get Variant (Shift + F5).

2. Click the multiple selection button next to **Variant** (or **Created by** if you know the creator) to search.

*Note: Do not edit existing variants, ask team leads if unsure.*

- Select applicable variants.
